Learn how you can save lots of money with our ["free accommodation"!](#)

Remote attendance possible now for CCIE Bootcamps saving lots of expenses!!!

A happy Heinz Ulm"-CCIE 34847

Heinz Ulm's Book recommendations

If you're already dreaming "I wanna be a CCIE" then I highly recommend reading the following books.

(images were taken from Amazon)

A great source of info is an appendix of Cisco's CIT- and CID-course. The appendix is called "Protocol characteristics overview" and carries condensed info about almost all protocols and technologies (with very few exceptions)

- [Why Heinz Ulm ?](#)

" WOW - I thought – I really passed it ! What a wonderful feeling after the endless hours of studying before the exam. I cannot explain how good this feels. But those of you who have done the exam will know what I mean. I think I would not have passed it on the 1st attempt without the weeks of full-time preparation right before the exam. Special thanks to Heinz Ulm (aka Drill-Heinz) and Heiko Groeger, instructors at the famous Heinz Ulm Bootcamp for the challenging mock labs, and all the good advice. MOCK H was EVIL !! "

CCIE 23777 on 1st attempt
